“YOUR DATA WHEN YOU NEED IT, WHERE YOU NEED IT”™

EnduraData’s EDpCloud is a robust cross platform, cross operating system solution that automates encrypted data transfer between geographic sites and business processes. It integrates with the workflow, runs on existing hardware, reduces costs and increases operational efficiency.

Consolidate Your Backups

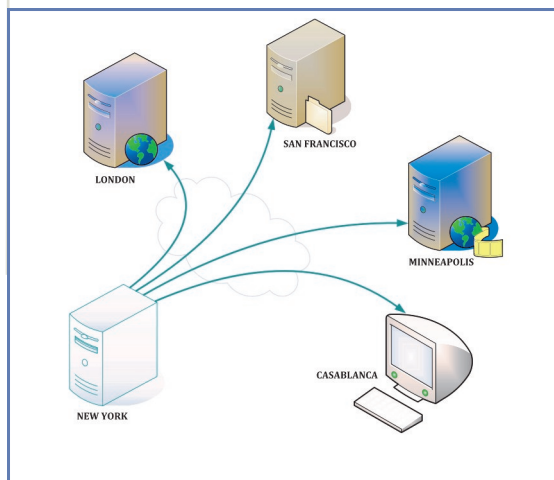

- If you have critical data, chances are you will experience at least one disaster due to random or malicious events. If you do experience one such event, your business may be crippled permanently or temporarily
- You can reduce the chances of data loss and down time by using EDpCloud to automatically backup many servers or laptops to one or more local or remote servers.

Cross Platform Backup Consolidation

Cross platform solutions

- Managed File Transfer
- File Replication
- The same software works on many platforms: Windows, Mac, Linux, Unix
- Portable to major operating systems

File Transfer and Data Distribution

Your private cloud

- Use your existing infrastructure to create your own private cloud where you have full control over who has access to your valuable data and trade secrets
- Gain a competitive advantage by automating inter-site reliance, reliability and collaboration.

Automate workflow, data movement and operations

- Automate File Transfer
- Use Replication to move data, backup files
- Distribute and share data between remote sites.

EDpCloud for Linux, Mac, Windows and Unix

EnduraData Private Cloud (EDpCloud)

FEATURES

- Cross platforms :Open Solaris, Linux, Mac, Windows, Solaris
- One to one
- Many to one
- File archive
- File versions
- Encryption
- Secure communication
- Distribution maps
- Easy to use GUI
- Bandwidth usage control
- History
- Statistics
- Extensive logs and audit
- Job Management
- Job priority
- Filtering
- Compression
- Pause/Resume
- Command line interface
- Resilient transport
- Fault tolerance
- Detailed logs and tracing

PROBLEMS SOLVED:

- Data Transfer & Migration
 - Remote Backup
 - Replication
 - Synchronization
 - Workflow automation
- | | |
|---|--|
| ◆ Automate file transfer | ◆ Increase ROI |
| ◆ Cross platform | ◆ Build your own private cloud |
| ◆ Cross Geographic Sites data movement | ◆ Extensive logs an stats |
| ◆ Processes | ◆ Build, extend, integrate with operations |
| ◆ Secure Data Sharing | ◆ Post/Pre Processing |
| ◆ Secure Data Transfer | ◆ Audit & Trace |
| ◆ Share data between sites and partners | ◆ Encrypted messaging |
| ◆ Leverage infrastructure | ◆ Encrypted files |
